Track™
Right. On Time.

Track™ SAP® Integration Module

Track Software has created a turnkey solution for companies seeking seamless data sharing between SAP and Track called the **Track SAP Integration Module.**

We've developed tight, bi-directional integration with SAP to support our customers' mission-critical requirements. Track SAP Integration Module pulls cost object information from SAP and pushes payment information back to SAP to close the loop.

Fully automated data sharing between SAP and Track enables companies to continue their existing SAP project planning work processes and improve project information accuracy and speed while minimizing human touch.
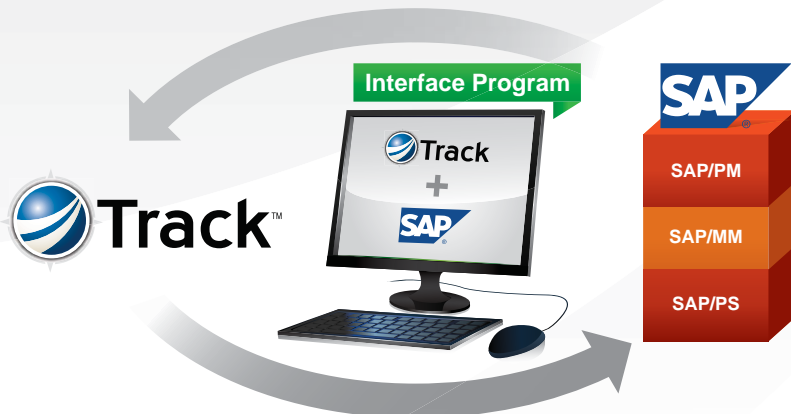

> *This module is critical to realizing the full benefits of both Track and SAP.*
>
> — **IT Project Manager,**
> Global FORTUNE® 5

SAP COST OBJECTS FOR TRACK ALLOCATION
PO's with Line Items
WO's with Ops & Sub Ops
Network Orders & Activities

Interface Program — Track + SAP

SAP/PM
SAP/MM
SAP/PS

SAP UPDATES FROM TRACK
Post SES Time Confirmations
